

# *Surg-N-Vac one un-wrap system*

## Compare your costs.

Instrumed's Surg-N-Vac Kit \$18.00

Other companies products that must be assembled together

|                      |              |
|----------------------|--------------|
| ESU Pencil-----      | _____        |
| Shroud-----          | _____        |
| 10'Tubing-----       | _____        |
| Adaptor-----         | _____        |
| Holster-----         | _____        |
| Extensions Sleeves-  | _____        |
| Teflon coated Blade- | _____        |
| <u>TOTAL COST</u>    | <u>_____</u> |

The PenEvac approximate \$35.00

All of the above pricing is approximate with the exception of the Surg-N-Vac.

Note: Should your Surgeon be using a standard ESU pencil with shroud and then decides to use the PenEvac your cost will then almost double to approximately \$65.00 or more.

With the Surg-N-Vac you have the ability to perform deep surgery with a long blade and long extension, or simply use the short extension with our standard Teflon blade as packaged. No assembly required.

Total Annual cost using competitor's products
